

iMic

U S B A U D I O I N T E R F A C E

Full USB Plug and Play Operation For Audio Playback and Recording

Griffin Technology's iMic USB audio interface offers an unparalleled level of quality and convenience for audio recording and playback on modern Macintoshes equipped with native USB ports. Designed specifically for the Macintosh, the iMic appears as standard inputs and outputs in the Sound control panel, allowing it to work with most applications and software. Standard input and output connectors allow you to connect to nearly all audio gear like microphones, home stereos, musical instruments, powered speakers and much more.

PRODUCT FEATURES

- Add full audio I/O to your native USB-equipped Macintosh
- USB interface makes connections as simple as "plug and play"
- Full spectrum audio frequency response for high fidelity audio reproduction
- Standard 1/8" (3.5mm) stereo input jack works directly with a wide range of consumer microphones and is easily adapted to home stereos, VCRs, musical gear and most anything else
- Standard 1/8" (3.5mm) stereo output is perfect for connecting to powered speakers, headphones, receivers/amplifiers, and much more
- Front-mounted toggle switch allows you to accept either low-power devices such as microphones or high-power line-level devices such as consumer stereo equipment

Weighing in at just under two ounces and sporting a small form, the iMic can travel with any laptop computer.

SPECIFICATIONS

Model Number: 2020-IMIC
USB interface
Frequency response: 20Hz-20KHz
Audio input: 1/8" (3.5mm) stereo line/mic-level minijack
Audio output: 1/8" (3.5mm) stereo line-level minijack
Hardware control: toggle switch for mic/line setting
Diameter: 2.5 inches
Thickness: 0.84 inches
Weight: 2 ounces

MINIMUM SYSTEM REQUIREMENTS

Any Macintosh with native USB support
Mac OS 9.0.4 or greater
